Reply Brief

The reply brief filed 10-26-2005 has been considered and entered.

The amendment after final has been entered in accordance with the examiner agreeing to the applicant's statement with regard to "Status of Amendments After Final" in the Examiner's Answer and the examiner stating "Please Enter" on the cover sheet of the amendment (8-16-05). Claims 13 and 16 will be permitted to be argued independently, as grouping of claims is no longer practiced, these independent grounds should be placed under the "Grounds to Rejection to be Reviewed on Appeal" not "Issues for Review". Furthermore, the Examiner submits that the words "relation" and "inter-relation" are words that have a definition in the art and need not be defined by the examiner. The Examiner disagrees with the Applicant's argument that the Examiner hasn't rebutted the Applicant's contention that if the Schaefer et al. reference were modified to have an appearance close to that of Feller, sufficient motivation is believed to have been presented for the partial modification of the interface.

The application has been forwarded to the Board of Patent Appeals and Interferences for decision on the appeal.
